

Mahmud Ağdaş

M.Sc. Electrical Engineering

🏠 Kurzekampstraße 16R, 38104 Braunschweig
✉ mahmud.agdas@posteo.net
☎ +49 (0) 162 981 32 32
📍 Born June 1, 1989, in Braunschweig
👨‍👩‍👧 Married, 2 children (6 and 9 years old)

PROFESSIONAL EXPERIENCE

Volkswagen AG – Electrical Systems Development (EKE)

Technical Expert | Oct 2022- Present

- Software Factory SDV – Responsible for Software Build and Release.
- Anti-theft-alarm siren ECU – Responsible for component development, Tier-1 coordination, and validation.
- 48 V power supply system – Conducting evaluations, supplier workshops, and technical reporting for future architectures.
- Electronic Main Fuse Box (eHSB) – Led ECU test management across HiL, prototype, and pre-series stages.
- Zonal controller eFuse validation – Managed test planning and automation concepts for eFuses.
- Standardized test workflows and documentation, ensuring consistent verification and traceability.

IAV GmbH – Connected Software Systems & Services

Software Project Lead / Test Manager / Software Developer | Aug 2015 – Sep 2022

- Body Control Module (BCM MQB37w, VW Atlas PA2) – Directed software integration and delivery processes, managed ARXML interfaces, and led U.S.-specific BCM version development under tight schedules.
- Child Presence Detection (CPD) – Led the ASPICE Level 2 software project, overseeing full lifecycle from design to vehicle validation with minimal team resources.
- BCM Software Architecture (SwArchBCM) – Developed ARXML consistency checker and standardized delivery and change-management processes across 20+ stakeholders.
- Immobilizer System (WFS) – Built test management processes from scratch, achieving ASPICE Level 2 compliance and transforming a new team into an efficient validation unit.
- Parking Coordinator (PaCo) – Implemented and demonstrated model-based prototype that secured project sourcing and later evolved into a production software component.

Elektrobit Automotive GmbH – ECU Engineering Services

Working Student | Apr 2013 – Sep 2014

- Developed a CAN residual bus simulator supporting ECU validation and test automation.

Technical University of Braunschweig – Institute of Control Engineering

Research Assistant (Student) | Feb 2013 – Nov 2015

- Designed and built a 1:5-scale model vehicle with torque vectoring for laboratory validation.
- Supported R&D for electric drive control systems in academic projects.

EDUCATION

M.Sc. Electrical Engineering, TU Braunschweig (Grade 1.6) | 2014–2015

Master's Thesis (Grade 1.0)

- Single-wheel torque vectoring control for over-actuated vehicles.

B.Sc. Electrical Engineering, TU Braunschweig (Grade 2.8) | 2009–2014

Bachelor's Thesis (Grade 1.3)

- Battery management system for electric vehicles.

CERTIFICATIONS & TRAINING

Wiring Systems Specialist	IHK 2023
AUTOSAR Classic in Practice	Vector GmbH 2019
Provisional ASPICE Assessor	Kugler Maag / VDA QMC 2019
Agile Development	Kugler Maag 2018
Project Management	Wuttke & Team 2018
Adaptive AUTOSAR	Vector GmbH 2018
ISTQB® Certified Tester	IAV / Cert-IT 2017
ISO 26262 Functional Safety	IAV 2016

TECHNICAL SKILLS

Programming	C, Python
Model-Based Design	MATLAB / Simulink, IBM Rhapsody, Enterprise Architect
Version Control & CI/CD	Jenkins, GitLab, GitHub, Bitbucket
Requirements Management	IBM DOORS, PTC AVW
Testing & Validation	CANoe, PikeTec TPT
Project Management	Jira, Confluence, MS Project, Cplace
Configuration Management	StarTeam, Group DMS
Office & Documentation	LaTeX, MS Office

LANGUAGE SKILLS

English	Fluent
German	Native
Turkish	Native
